Las celdas con **fondo verde oliva** contienen la frecuencia de canales especiales que se pueden obtener si disponemos de desplazamientos de ± 10 KHz. Algunos modelos de radiocontrol y otros servicios suelen utilizar estas frecuencias. Las celdas con **fondo verde claro** son las frecuencias actualmente legalizadas para la CB en España. Los canales de la banda de 10 metros, destinadas a radioaficionados con licencia A y C, están en las **celdas con fondo rojo**.
